## Peter Mac's 'Tightly Wrapped' Is A Staff Favorite

Url: <http://www.rockitrecordsusa.com>

Greendale, WI USA – February 16, 2005 – Peter Mac's recent release, "Tightly Wrapped", is gathering momentum. It is currently listed as a 'staff favorite' on the MP3 download site, [louburst.com](http://louburst.com).

The CD features twelve original, 'fretboard-on-fire' tracks that capture the passion, grace, and technical mastery that Peter is known for. Ranging from the moody and soulful to blistering and intensely edgy, this instrumental CD articulately demonstrates a nice array of his swift and fiery progressive styles and explosive guitar skills.

Mac is a talented performer who earned a stellar reputation performing regionally with his band, The Converters. He gained national recognition touring with various funk and jazz-fusion bands and as a result of his extensive commercial and studio work. His diversity has allowed him to share the stage with a wide variety of acts crossing many genres... acts such as Kenny Loggins, Dave Koz, Tower of Power, the late Danny Gatton, Grover Washington, Jeff Healey, Eddie Money, Kansas, Doc Severinsen, Tim Wiesberg, Jeff Lorber, The O'Jays, Al Jarreau, and many others. Since 1991, Peter has spent part of his time as an integral member of the band Streetlife, who, during the NBA season, serve as the jazzy house band for the Milwaukee Bucks. Although Peter is proficient with any style, "Tightly Wrapped" returns to his musical roots in Progressive Rock and Jazz. These are styles that he enjoys and is very adept with, facts that become obvious when listening to this recording.

Check out Peter's artist page on [louburst](http://www.louburst.com) at [http://www.louburst.com/artist/?band\\_id=369](http://www.louburst.com/artist/?band_id=369). All tracks are available there for download. Or, you can buy or find out more about the Tightly Wrapped CD at <http://www.rockitrecordsusa.com> [back](#) | [top](#)

[LightScribe: Laser Etched CD Labeling](#)  
CD/DVD Drive Burns CD Labels Without Paper Labels Or Ink!

**LightScribe**, a brand new burn-it-right-onto-the-CD labeling system, uses your computer's data drive to create labels. With LightScribe products, we can throw those labels and thingamagigies and ink cartridges - no, we'll keep the ink cartridges for those cover letters to that publisher/venue/A&R rep - away and start a brand new day of CD labeling!
