Reverend Raven's LIVE CD Is A Staff Favorite

Url: <http://www.rockitrecordsusa.com>

Greendale, WI USA – February 16, 2005 – The latest release from Reverend Raven and the Chain Smokin' Altar Boys, entitled "Live at Blues on Grand", is finding an expanded audience. It is currently listed as a 'staff favorite' on the MP3 download site, louburst.com.

Recorded at BLUES ON GRAND in Des Moines, Iowa, this live recording mixes Raven originals with covers of vintage and classic blues gems by Freddie King, Howlin' Wolf, Slim Harpo, and more. It showcases a tight and cohesive band trading licks that howl and wail, portraying both vitality and intimacy, and proving the band's understanding and love of "The Blues."

Reverend Raven and the Chain Smokin' Altar Boys have built a stellar reputation throughout the Midwest for their energetic live performances that exude the raw power and pleasure of Electric Blues... Chicago Style! The Rev wields a wicked blues guitar and his voice emotes the very essence of the blues. Add additional vocals and some of the baddest blues harp blowin' you're ever gonna hear by Madison Slim. Slim has honed his chops with a who's who of blues including Jimmy Rogers, Pinetop Perkins, Willie 'Big Eyes' Smith, Sam Lay, and a long list of others. When it comes to the Blues, you know you can trust Blues Legend Buddy Guy and he says, "These guys are very good!"

Check out the Rev's artist page on [louburst](http://louburst.com) at http://www.louburst.com/artist/?band_id=409. All tracks are available there for download. Or, you can buy or find out more about the this Live CD at <http://www.rockitrecordsusa.com> [back](#) | [top](#)

CD/DVD Drive Burns CD Labels Without Paper Labels Or Ink!

LightScribe, a brand new burn-it-right-onto-the-CD labeling system, uses your computer's data drive to create labels. With LightScribe products, we can throw those labels and thingamagigies and ink cartridges - no, we'll keep the ink cartridges for those cover letters to that publisher/venue/A&R rep - away and start a brand new day of CD labeling!
