Greendale, WI USA – The Legendary Gary Tanin's mid-90's release, **SUBLIME NATION**, is once again gaining new audiences. It is currently listed as a 'staff favorite' on the MP3 download site, [loudburst.com](http://loudburst.com).

Of course, it is no small surprise that this recording manages to hold it's own amongst the plethora of downloadable tracks out there... It is laden with Tanin's classic pop style tunes and features a veritable world-class list of talented players, including Jerry Harrison (Talking Heads); T Lavitz (Dixie Dregs); Junior Brantley (Fabulous Thunderbirds, Jimmie Vaughn Band); Victor De Lorenzo (Violent Femmes); Fender Clinician Greg Koch (Greg Koch and the Tone Controls); Scott Finch (Gypsy, Bluehand); and many more...

As a musician, Tanin's career spans decades. As an engineer and producer, he works with some of the world's greatest. Long ago, he mastered the integration of technology and music. This synergetic marriage of art and science has resulted in a personal body of works that has garnered international critical acclaim and earned him a worldwide reputation as a consummate innovator. It's no small wonder some of the greatest recording artist's on the planet turn to Tanin for help on their albums.

All of this just goes to prove the theory: Great Songs + Great Musicians + Great Recording = Classic CDs that live on.
